DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 40, 41 and 58-60 drawn to knife for wood chipping including two spaced apart deflector ridges terminating in a single linear edge parallel to the cutting edge, said back side including a semi cylindrical interlocking feature.

Group II claim(s) 42 and 43, drawn to clamp for clamping a knife, the clamp having a projection for engaging a recess in the knife.

Group III claim(s) 44-57, drawn to a wood chipping apparatus having a knife and clamp differing from that of the knife and a clamp of Groups I and II (i.e. no deflector ridges) and having an inner clamping member having a second semi-cylindrical interlocking feature.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the reasons noted above the inventions of Groups I-III are separable and distinct.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
